ABOUT ME

Ambitious student with experience in mobile development and strong Java and Kotlin programming skills. Looking to apply my knowledge to create high-quality applications. Looking for an internship to deepen my skills and contribute to interesting projects in a team of professionals. Open to new challenges and ready to learn from experienced colleagues.

EDUCATION

BSU

Faculty of Applied Mathematics and Computer Science

2022 - 2026

LANGUAGE

Russian — Native

English — B1

Experience

02/2025 - 05/2025
Android Developer
MODSEN

Developed Android applications in Kotlin using Jetpack Compose, MVI, and Clean Architecture. Implemented API integration with Retrofit, utilized Koin for dependency injection, and managed local data storage with Room.

Courses

2024
Stepik

Development of mobile applications for Android

The course introduces the basics of Android application development.

2024
Tinkoff

Android for beginners

In this course, I got acquainted with Retrofit and OkHttp, Coroutine, Flow, SharedPreferences, and also studied the principles of SOLID and the architecture of MVVM, MVP and MVI.

2024 - 2025
Udemy

Android development from scratch to a professional

In this course, I worked with audio, video, and images in Android development, used phone apps in my projects, and also worked with Fragments, databases and network queries.

Skills

Kotlin   Java   XML   Android Studio   Gradle
Jetpack Compose   Room   Koin   Retrofit
